## Wheat Acreages And Crops Reduced

Evidences of material reduction in world wheat acreages for 1931-32 are announced in the review issued today by the Dominion bureau of statistics.

The United States "intentions to plant" report as of March 1, indicate a 24 per cent reduction in duration acreage and a 12 per cent reduction in the acreage of other spring wheat. Reports from Argentina and Australia mention the possibility of even larger reductions, influenced largely by the prevalent low prices.

Broomhall's of March 31, estimated the Australian acreage reduction at 30 per cent or 3 to 4 million acres. The Argentine ministry of agriculture states that the reduction in that country will amount to 15 or 20 per cent. The probable Canadian acreage for 1931 will be forecast by the "intentions" report of this bureau released on May 12.

## Golden Weddings.

Mr. and Mrs. C. Wrightson celebrated their golden wedding anniversary on Sunday last at their home here. Their son, Mr. Charlie Wrightson and daughter, Mrs. H. W. Morgan and their families together with a number of friends were present, though the severe storm prevented another number of friends from being able to attend.

Mr. and Mrs. Wrightson were the recipients of a purse of gold from relatives and friends in England together with many presents from local relatives and friends.

Mr. and Mrs. Wrightson (nee Jane Smith) were married at Newcastle-on-Tyne, England on April 18th, 1881. They resided in Newcastle till 1909 when they came to Alberta, coming to reside in Didsbury in 1914.

Of the union were born two daughters, Mrs. A. M. Laing, of Newcastle, England and Mrs. H. W. Morgan, of Didsbury; one son, Mr. Charles Wrightson, of Didsbury. They also have eight grandchildren. We join their many friends in wishing them many more years of married life.

Over sixty relatives and friends of Mr. and Mrs. John Metzgar, of Scott Road, Penitence gathered at their home on Friday, April 3rd, the occasion being the golden wedding anniversary of the couple.

All their sons and daughters were at home for the celebration, this being the first time the entire family have met together for twenty-one years. After the dinner the bride and groom were presented with a purse of gold coins and a brooch and tie pin made of gold nuggets.

Mr. and Mrs. Metzgar were married in Mount City, Missouri on April 3rd, 1881. In 1906 they settled in Alberta where Mr. Metzgar was a successful farmer for twenty-one years. At the end of that time they moved to the Okanagan, choosing this as the finest spot to spend the closing years of a busy and useful life.

## "Y" Notes.

The April meeting of the "Y" girls was held on April 14th at the home of Margaret Kercher.

The meeting opened with the president in the chair, after which Miss Zelah Gressman read the scripture lesson. The treasurer then gave her report, which was not as good as it might have been. However, we trust that the girls who have not paid up will make an effort to do so.

After the business meeting, the girls presented Mrs. J. B. Fulkert (nee Freda Moon) with a basketful of very pretty and useful gifts. A dainty lunch was then served by Mrs. Kercher, after which the meeting adjourned.

## BORN:

At Didsbury General Hospital

To Mr. and Mrs. M. Woods on April 19th, twin daughters.

## LOCAL & GENERAL

Mrs. W. Lyons, who has been visiting in the east for a few weeks returned home on Saturday.

Messrs. H. Pearson and A. C. Fisher made a business trip to Calgary on Monday.

A number of local boys went to Calgary to take in the wrestling match last Thursday evening.

English Watches. Grandfather Clocks, and Chimes. Everything Ancient and Modern. Bring it to W. Monteith, North End Jeweller.

Richard Bartholomew in "The Lash," all talking pictures at the movies tonight (Thursday). Regular prices.

We are pleased to hear that Mrs. Hayes, who has been ill for the past two weeks is considerably improved.

Mrs. Sunberg (nee Florence Morrison) relieved at the hospital last week while Miss Terry attended the I.O.E. convention in Edmonton.

Mr. E. Brado, who has farmed east of town for the past thirty years has moved to Cremona where he has purchased a section of land.

Mr. W. Leadbetter left on Wednesday for Calgary where he will spend a few days before leaving for England.

A General Hospital for sick Watches, Clocks, Phonographs, Sewing Machines, Etc., Etc. In front corner of Club Lunch. All work guaranteed.—Advt.

Mr. J. Helton has taken over the agency of the Canadian Oil Co. and will soon be found in the new office that is being erected at the plant south of the depot.

Mr. E. B. Parker, who has been residing in Gannock, Ontario for some time has returned to Didsbury to look after his business interests here.

On Friday last a son was born to Mr. and Mrs. Nile Hunsperger. A unique feature of this event is that the new baby has two great-grandmothers residing in Didsbury.

Mrs. J. Morgan, of Calgary spent the week-end at the home of Mr. and Mrs. H. W. Morgan. She also attended the Wrightson golden wedding celebration.

"With Byrd at the South Pole." At the Opera House next Thursday. See this greatest event of modern times. Regular prices "The Indians are Coming," a new serial starts with this picture. No extra charge.

Mr. Sharp's offer of a prize to all children who attended the movies last Monday proved a bigger success than expected. It is reported that the stock ran out and he had to go and procure another supply.

## "H.M.S. PINAFORE" HERE ON MAY 8th

The United Church Choir has been successful in negotiating with the Olds Choral Society to bring their performance "H.M.S. Pinafore" to the Opera House on Friday May 8th.

This is the most popular of the Gilbert & Sullivan light operas and its splendid music and scenic merit. All those who saw the recent production of "Cherry Blossom" will have an idea of the quality of the artists as most of them are taking part in this production also.

The leading parts will be taken by the following:

Josephine.....Mrs. D. Grant  
Battercup.....Mrs. Oliver  
Captain.....Mr. W. Gooder  
Sir Joseph Porter.....Mr. L. Smith  
Dick Deadeye.....Mr. W. Craig  
Ralph Rackstraw.....Mr. W. Ashcroft  
There is a chorus of forty voices in several Didsbury people are included.

Over fifty members of the Mizpah Chapter of the Eastern Star paid a visit to the local chapter on Tuesday evening. There was a large attendance of local members. After lodge supper was served and a social time was enjoyed. During the evening a presentation was made to Mr. W. Leadbetter, who is leaving for the Old Country. All the members joined in wishing him a pleasant trip.

The Evangelical paragon was the scene of some real mental activity last Tuesday evening when the Junior Christian Endeavor were busying themselves writing an examination on religious education. This group has been studying the "Church Catechism" for more than a year at their meetings as part of their regular program. The study has to do with several hundred Bible references on doctrine, including the books of the Bible for memory work, also the ten commandments, apostles' creed, etc. About ten wrote the examination and to whom will be awarded a special certificate at a public service in the near future.

## More Wheat Shipped Than Last Year

There has been more wheat shipped from the district this year than the previous year. Almost 700,000 bushels of wheat have been shipped up to the present but the shipment of coarse grain has been lighter than in previous years, only 20,000 bushels of coarse grain being shipped.

In talking to the elevator men we find the amount of grain in storage in the elevators is approximately the same as last year at this date though they state there is considerably more wheat stored on the farms than was the case last year, while only a small per centage of coarse grain has been marketed.

In 1929-30, 550,000 bushels of wheat were shipped and 125,000 bushels of coarse grain.

The largest crop ever shipped out of this district was in 1923 when almost a million and a quarter bushels of grain were shipped and of which 55 per cent was coarse grain. In 1929, 1,100,000 bushels were shipped, of which 90 per cent was wheat.

## W.C.T.U. Convention To be held at Olds

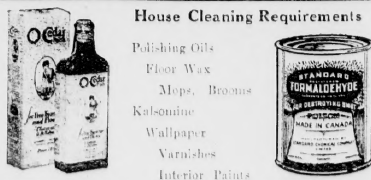

The nineteenth annual convention of the Central Alberta District of the W.C.T.U. will be held at Olds on Tuesday and Wednesday of next week.

On Tuesday afternoon, the question of "World's Peace" will be discussed and the Essay Contest and how to establish contact with the schools will be dealt with. A banquet will be held at 6 p.m., after which a musical program will be given together with lantern slides and an address by Mrs. L. C. McKinney.

Wednesday morning will be devoted to reports and election of officers. In the afternoon, "Temperance Education in the Sunday School" will be under discussion and a playlet "As a Twig is Bent" will be given by the Red Deer Union.

## ENO'S FRUIT SALT

### The Safest, Surest Way To Health

The daily dash of ENO in a glass of water every morning is the safest, surest way to inner cleanliness. And to be inwardly clean is to be healthy.

ENO'S "Fruit Salt" is a delicious health beverage that tones and sweetens the entire system. For constipation, acid stomach, fatigue and biliousness it is without equal.

But remember, only ENO can give ENO results.

### A 1931 Seed Time Problem

Seedling time throughout Western Canada is at hand, and as the farmer overhauls his ploughs, harrows, and seeders in preparation for the spring work, he naturally is looking forward and planning just what he ought to do in the light, not only of his own individual circumstances, but of prevailing world conditions and prospects.

The prairie farmer is an optimist, as a rule. Indeed, to succeed, he can hardly be anything else. Unquestionably, however, there is less optimism prevalent as the season of 1931 opens than in usually the case throughout this western country, and many farmers are in somewhat of a quandary in reaching a decision just what is best for them to do this year.

Most of them have been growers of wheat. It has been their major article of production. Upon it they have depended for success. But for the past year and a half wheat has been a drug on the world's markets. The selling price has fallen well below the cost of production. There is a large surplus stock on hand in various countries. What, then, is the prospect for disposing of a new crop of wheat at profitable prices in 1931? Yet the vast majority of prairie farmers cannot turn from wheat growing to something else in one short season, even if it was advisable to do so.

Under these circumstances should the farmer proceed to seed the average number of acres he has been seeding in years past? If he does and all the great wheat growing countries, as well as Canada, harvest an average normal crop, will the price obtainable for the wheat yield him a profit, or will it again fall to cover the costs of production and leave him in a worse position than if he had grown no wheat?

Inasmuch as the farmer cannot rest from growing something—his livelihood depends on his production—and as the prevailing prices for coarse grains are less than production costs, the farmer is confronted with a real problem, and one he must decide for himself. Another crop failure, or partial failure, would be a disaster. Equally, a large crop throughout the world would mean less to the producer. It is a gamble either way. If the average crops were good, the rule in other great wheat producing countries, his course would be clear. But as this no man can foretell.

Possibly many farmers will consider it wise to merely seed sufficient acreage to provide him with a livelihood if all goes well, and devote his time to the eradication of weeds and the more thorough cultivation of his land in preparation for future operations, coupled with the planning and expert care of a garden sufficient to supply the needs of his own family during the summer and next winter.

A goodly number of farmers will have to look to the Government to supply them with seed; many others will not be able this year to buy registered seed, but whatever acreage is sown, be it large or small, should be seeded with good, clean seed, the best it is possible to obtain under the circumstances.

Generally speaking, too, farmers will have to keep down all overhead expenses. Last year's plough, harrow and seed drill will have to do service another year. Therefore, careful overhauling of all present equipment will undoubtedly be one of the outstanding activities on farms at this time. The farmer and his family may have to work even harder than usual and possibly get along with one kind of food where formerly two were employed, even though this may operate to continue or temporarily intensify the existing unemployment.

In a word, everybody must face and adapt themselves to the hard, unpleasant aspect of the existing situation. Present problems cannot be solved and difficulties removed solely by Governmental action, the extension of credit, or any other external agency or action. These may help, but at best, they are only temporary palliatives. Each individual must, in the final analysis, face his own problem, decide upon his own line of operations this spring, work out the basic necessities to his own salvation.

This article is not a pamphlet at farmers; it is not an attempt to advise farmers, for if there is one individual for whom the writer has a concern it is the arm-chair critic. The arm-chair farmer. The existing situation, as the writer sees it, is that each and every man must exercise his own best judgment in the light of his own particular circumstances, and proceed with all the ability and energy of which he is capable to work out the solution of his own problems, and thereby make his contribution towards finding a solution to the problems of all others and the country as a whole.

The Hawaiian Islands are the scene of mountains rising from a plateau thousands of feet below the ocean level.

Joseph is the mother-in-law of the fisherman.

The average American eats about 18 pounds of tomatoes of the bottled and canned varieties in the course of a year.

According to Einstein's theory of relativity, light has weight.

### The Value Of Carbon

No Form Of Life Can Exist Without This Atom

The most wonderful substance in the world is carbon. Soft, lamp black, and pencil leads are all forms of carbon and so is the diamond. The carbon atom possesses one remarkable quality. It enables other atoms to combine into huge groups or families from which all kinds of substances are made. By themselves, the atoms oxygen, hydrogen, and nitrogen can produce nothing very startling, but add carbon and their combinations become amazing, giving rise to such substances as petrol oil, medicines, bread, and meat. If it were not for carbon, life could never have existed upon this or any other world. All kinds of living things—fish, flesh, fruit, and fowl—owe their existence to the carbon atom. No one knows why about he as for the carbon atom differs from others only in having one electron more or less than they. But it is quite certain that it is the foundation-stone of all life.

### Just Right For Upset Stomach

For after-eating distress, gas, heartburn and flatulence, the quick and positive retreating action of Bismarck's Mints has proved to be the right thing. Bismarck's Mints are a certain and gratifying, almost instantly feeling the very first day—and a few days later, you will have a good digest, last for a long time.

### German Invents New Mirror

A non-breakable mirror of wood has been invented by a German scientist. The wood is soaked in a caustic alkali after which it is put through a process of immersion into metals and chemicals. The wood then is dried and rubbed with a smooth piece of lead, tin or zinc, until it is brilliantly polished.

### Nothing As Good For Asthma

Asthma remedies come and go but every year the sales of the original Dr. J. D. Kellogg's Asthma Remedy grow greater and greater. No other remedy could be asked of its remarkable merit. It relieves. It is always of the same unvarying quality which the sufferer from asthma learns to know. Do not suffer another attack, but try this splendid remedy today.

### Growth Of Canadian Newspapers

The first issue of the Halifax Gazette, Canada's first newspaper, was printed on a half sheet of foolscap. Some of the Saturday and weekly editions of present-day Canadian newspapers require 60 to 100 pages, 8 columns wide and 28 inches deep, in which to give the desired information to the people.

### Persian Bain—the one toilet requisite for the dainty woman.

De-lightful to use. Leaves no stickiness. Swiftly absorbed by the tissues. Delicately fragrant. Imparts a velvety loveliness to the complexion. Tones up the skin. Softens and banishes all unpleasant roughness or chafing caused by wind and other weather conditions. Make hands soft and white. Creates an elusive, essentially feminine charm. Persian Bain is indispensable to women of refinement.

### Making Business Hum

A London, England, department store gave out \$2,500,000 worth of orders to wholesale houses in one day. It then published an ad in the newspapers inviting the public to come and buy the lot up in one week. That's the way to make trade hum.

### Excellent For Croupy Children.

When a child is suffering with croup it is a good plan to use Dr. Thomas' Electric Oil. It reduces the inflammation and loosens the phlegm, bringing speedy relief to the little sufferer. It is equally reliable for sore throat and chest, croup, rheumatic pains, cuts, bruises and sprains. Dr. Thomas' Electric Oil is regarded by many thousands as an indispensable of the family medicine chest.

### Canada's Highways

The total highway mileage of all classes of road open for traffic in the Dominion of Canada at the end of 1929 (latest official figures), amounted to 390,000, which was an increase of 8,883 miles during the year.

The safety-pin is said to have been thought up by the Romans and early Egyptians, and differed little from those in use today.

W. H. U. 1882

## Dead and Run Down RADIO AUTO Batteries

### Instantly Charged

If there is no agent in your territory, write AT ONCE for introductory offer on this Battery Charging Service. Don't throw away your old battery—prove for yourself its "Long Charge" with an hour old battery with **Posi-Power—Long Life** and save the cost of a new battery. **Then—make the money** treating other batteries in your district. Agents make from \$100.00 to \$500.00 a single demonstration. MAIL COUPON TO-DAY.

Don't miss—Send money order for \$1.00, for which please send me two boxes of "SELF-CHARGE". One box for my own battery and one I sell at the regular price of \$5.00 per box, or write for further particulars.

### Escaped From Russian Prison

English Engineer Under Care Of British Embassy At Warsaw

M. Thompson, an English engineer, has been taken care of by the British Embassy at Warsaw, Poland, following his escape from Russia. The man was found hanging under a car when the Moscow-Warsaw express reached Warsaw. He said that he had been working in a Russian factory and had been arrested by the G.O.P.U., the Russian secret police, and taken to a prison in Tomsk. He escaped and reached Warsaw by walking and by beating his way under trains.

### Would Say Plenty

Lemuel—What would your wife say if you bought a new car?  
Samuel—Look out for that traffic light! Be careful now! Don't hit that truck! Why don't you watch where you're going? Will you never learn? And a lot more like that.

### White Hunters Protest

The Indians' right to trap beaver is contested by the white hunters of Fort Smith, in the northern part of Alberta. At a protest meeting, held recently, a number of the white trappers declared it was unfair to deny the white man the privilege of trapping the beaver, while Indians and half-breeds were allowed 15 beaver each season.

## Federal Government Issues Timely Advice Regarding Forest Protection In West

A statement on the forest fire situation in Western Canada has been issued by Hon. Thomas G. Murphy, Minister of the Interior, as follows:

"The well-being of the forest industries is so vital to Canada's general prosperity that the Federal Government must always retain an active interest in them. This interest necessarily includes serious concern with respect to forest fire losses. The Department of the Interior has a peculiar interest in the situation in the Prairie Provinces. There is, in the first place, the large area of federally owned forest in the National Parks which is endangered by fires in surrounding territory; there is the general responsibility for pressing forward the subject of forest conservation throughout Canada; and lastly there is the natural feeling of goodwill toward the new forest protective organizations of the Prairie Provinces, the majority of whose staffs have been recruited from personnel formerly connected with the field force of the Department of the Interior."

"Present indications are that these forest services are going to be faced with a very trying fire season during 1931. Weather conditions prevailing in Western Canada during the past three years have been remarkable for a continued deficiency both of snow and rain-fall. Added to the accumulated effect of the drought conditions experienced, there is the fact that throughout this region precipitation during the past four months has also been considerably below normal. The result, it takes lakes and streams are at very low level, irrigation storage waters being likewise affected."

"The forest fire season, 1929, was one of the most critical in the history of Western Canada. The season 1930 was likewise a trying one, although there was a considerable improvement over the year before in the matter of forest fire losses. This improvement was due in part to increased efficiency of fire protection, but particularly to a growing sympathy on the part of the general public, a state of mind that was given practical expression in efforts to co-operate in the matter of fire prevention."

"Inasmuch as the forest resources of the Prairie Provinces now belong wholly to the residents of those provinces it may be expected that public concern and public co-operation looking to reduction in fire losses will be even more evident. Nevertheless the mild winter and negligible amount of snowfall experienced throughout Western Canada to date means that, unless this region is favoured with exceptional precipitation in the next two months, the new western forest services must be prepared for a repetition of the extremely hazardous conditions which have marked the past three years. The efforts of these new services will have to be backed wholeheartedly by the general public because it will be only through the exercise of every precaution in the use of fire in or adjacent to the forest that disastrous fire losses in 1931 can be avoided."

"While the effect of forest destruction by fire is felt primarily in the region affected, nevertheless the losses incurred influence the general

economic situation throughout the country. It is with this point in mind that I would call the attention of our western citizens to the necessity of unrelenting care in the use of fire throughout the wooded regions."

By Eva A. Tingey

### CHARM AND MODISHNESS

All Tingey models are created and sketched in Paris and the patterns are made in New York.

There isn't anything any smarter than the black and white theme carried out in this model.

It's caftan crepe. The cossette cuffs add snap to the Russian bodice in slim wrappled movement. The attached skirt is circular, shaped so as to give sleek slenderness to the figure.

Extremely marvelous for real formal wear and "Sunday night" occasions in black and white transparent velvet.

Black crepe woolen with scarlet red is chic.

Fashioned of one material as forest green wool crepe with its only contrast in shoulder trimming flowers and cuffs of eggshell pink pique is smart.

Featherweight tweed may also be used for this model.

This pattern may be obtained in sizes 16 to 20 and 34 to 42. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

### How To Order Patterns

Address: Winnipeg Newspaper Union, 175 McDermott Ave., Winnipeg.

### States Still Importing Potatoes From Canada

#### Increase In Shipments This Year Attributed To Drought

Potatoes from Prince Edward Island and Nova Scotia are crossing the border despite the duty of 75 cents a hundredweight imposed upon Canadian potatoes in the Hawkey-Smoot tariff bill. The United States annually imports several million pounds of seed potatoes from the Dominion, but during January this year, imports of seed potatoes reached a total of 25,000,000 pounds, as compared with 10,792,000 pounds in the same month of the previous year. In addition to imports of seed potatoes in January, some 9,000,000 pounds of potatoes for food were imported.

Some weeks ago Baltimore, the centre of the potato producing area of Maryland, welcomed the steamer "Skagatind" with 9,250 bags of pure Nordic spuds in her hold. Before docking at Baltimore the ship discharged 21,000 bags of potatoes to feed New Yorkers.

Shipping men say the shipment of Canadian potatoes received at Baltimore was the first of its kind in many years.

Importation of Canadian potatoes in large quantities this year is attributed to the drought in the United States.

"Shall I help you with your sun?"

"No, teacher says I must make my own mistakes."

Little Johnny Fox is seen here handing Miss Isabel MacDonald, daughter of the British Labor Premier, the key at the recent opening ceremony of the new nursery school and library at Kingsley Hall, Dagenham, England. — Associated Press Photo.

## Results Of Research Program On Storage And Commercial Drying Of Damp Wheat

Further results from the extensive programme of research on the storage and commercial drying of damp wheat, which the Research Council initiated in 1927, are contained in a draft report which Edward Stansfield, Professor of Industrial Research, University of Alberta, and W. H. Cook, of the National Research Council staff at Edmonton, have submitted to the Council's Associate Committee on Grain Research Work, on which the final report will be made, is progressing.

In 1929 the Council published the report which set out the conditions then established under which grain could be dried without damage to its milling and baking quality. The investigation has been continued since that time under the general direction of Professor Stansfield. Mr. Cook constructed the improved drier that has been used and standardized the equipment and methods employed. The milling and baking tests so essential to the investigation were carried out in the co-operating laboratories of the Associate Committee attached to the Department of Field Crops, University of Alberta; Department of Chemistry of the Agricultural College, University of Manitoba, and the Department of Chemistry, University of Saskatchewan. The Seed Branch at Calgary, of the Dominion Department of Agriculture, made the germination tests.

It has been found that:

1. The efficiency of drying increased with the air temperature and decreased with the air flow. On the other hand, the injury to baking quality was affected more by the hot air temperature than by any other factor, and 180 degrees Fahrenheit must be regarded as the maximum safe air temperature. With air at 210 degrees, slight damage was occasionally observed, under ordinary conditions of drying while under extreme conditions, such as over drying, considerable damage was caused by air at this temperature. At still higher air temperatures, 240 degrees and 270 degrees Fahrenheit, the amount of damage increased not only with the air temperature but with the air flow. High wheat temperatures are to be avoided though not necessarily accompanied by damage.
2. The moisture content of the wheat before drying appeared to have little effect on possible resultant damage.
3. Drying in cold weather, when the air is excessively cold and dry seemed to increase slightly the risk of damage.
4. Drying very damp wheat in two

stages appeared to possess no advantage over the single stage method in preventing injury to baking quality. In fact, samples dried in this way showed slightly more damage than when dried in one stage and the drying operation was less efficient.

5. Drying wheat with single stream air (heating the air from the cooler section and forcing it through the heater section), gave a higher efficiency although the hot air contained more moisture. This method caused higher wheat temperatures, but no damage to baking quality resulted.

6. The effect of high atmospheric humidity was to reduce the efficiency of drying, and heat the wheat more, but it had no significant effect on baking quality.

7. Drying to a low final moisture content resulted in appreciable injury only when the air temperature was above 180 degrees Fahrenheit. At this temperature only slight damage took place on drying to as low as 10 per cent. moisture.

8. Batching drying experiments were carried out, using air temperatures from 120 degrees to 210 degrees Fahrenheit only. No significant damage took place under these conditions, and both the efficiency of drying and the baking results compare favorably with continuous drying runs made under similar conditions. The higher maximum and differential wheat temperatures in the heater section suggest a greater risk of damage, however, and this method of drying is not recommended.

9. Wheat decreases in weight per bushel as the moisture content increases, and heat drying never brings it back to the original bushel weight. The extent of recovery is greater when the drying covers only a short moisture range, and when the wheat is dried at a slow rate.

10. Germination tests were tried as a possible index of injury, and although they showed qualitative agreement in many cases, their value as a check on drying operations is not yet proven.

### Fish From Moose Factory

#### First Commercial Fishing License Issued To Northern Centre

With the granting of a license to a Moose Factory commercial fishing company, that northern centre will ship fish this year to New York and Chicago for the first time in history.

Although James Bay was discovered in 1631, it was only recently, it was claimed, that the first actual commercial fishing license was issued. Workmen already are constructing warehouses.

Late in May the first shipment will be made to New York. Large orders are said to have been secured from the United States cities.

### Tenacity Of Silk Thread

Because silk thread has greater tenacity than steel wire of the same diameter, an inventor in this country has developed a cannon made of steel tubes wrapped around with silk until the required size has been obtained.

Customer (doubtfully): Is it a pedigree dog?

Dogster-Pedigree! Why, if this dog could talk it wouldn't speak to either of us!

**SPROUTING SEED POTATOES**

(Experimental Farms Note)

The sprouting of seed potatoes in advance of planting is a practice that has long been followed by growers for the early market. The usual method is to bring the potatoes up out of the cellar, treat them with a fungicide and spread three or four inches deep in shallow trays exposed to the light. Growth processes are thus started and a rosette of tough, green sprouts is formed at each eye. Just before being planted the potatoes may be cut in the usual way, or they may be planted whole. Potatoes thus treated often emerge and also bloom a week or so earlier than those planted with non-sprouted sets. The degree of advantage depends considerably upon the soil temperature and the spring weather prevailing.

Since pre-sprouting forwards development it seemed reasonable to suppose that in a climate where frost might prolong the effective growing season and increase the yield. At the Beaveridge Substation seven years' experiments to this end were commenced in 1920. The outcome showed a fairly consistent advantage of tray-sprouted over dormant sets save in 1922, when it was only 1.1%, and in 1924, when because of an unfavorable early season and a moist late autumn the rule was reversed. In the average of seven years' work the net increase in yield was 11.6%.

The advantage of sprouting is naturally greatest with late planting and with late varieties. Even in 1922, when the specific trial showed scant advantage, a June planting gave 292 bushels per acre from a row planted with sprouted seed while only 120 bushels were obtained from a row planted with potatoes taken direct from the cellar.

At far northern points the advantage of sprouting is still more marked than at Beaveridge. The Oblate Mission at Fort Good Hope, within ten miles of the Arctic Circle, has for years supplied a convincing demonstration on this point, and its experience is being supplied elsewhere with advantage. In 1929 nearly all the sets were sprouted. The result was that on July 13 the potatoes stood 18 to 20 inches above their high mounds and were in full bloom.

It is true the matter of hastening development can be over-done. One grower north of the Arctic Circle refrains from sprouting his seed tubers for fear of getting the plants up too soon and thus exposed to late spring frosts, but most northern growers who have tried sprouting prefer to run this risk for the sake of the undoubted advantage to be gained.

**LOCAL & GENERAL**

Mr. J. Hall, of Carstairs was in town on Monday.

Scratch Pads may be obtained at the Pioneer Office, 2 for 5 cents.

Free hosiery with shoe purchases at J. V. Berscht's from April 25th to May 2nd.

The Atlas Lumber Co. will conduct a birdhouse contest for boys in both town and country. Watch the Atlas advertisement next week.

Mr. John Topley has purchased a half-section of land adjoining his farm east of town and is now busy putting in the crop.

Mr. H. W. Morgan, who is in attendance at the postmasters convention in Winnipeg this week will pay a visit to friends in Chicago before his return.

Mr. and Mrs. Ed. Moreland and family visited the former's grandparents in Calgary on the occasion of their 25th wedding anniversary on Thursday last. Five generations of the family were present.

A meeting of the Canadian Legion will be held in the Oddfellows Hall on Saturday evening. Mr. R. Webster will give a paper on "The Landing and Attack on the Mole at Zebruge." This is sure to be an interesting talk as Mr. Webster is a Canadian. Five generations of the family were present.

An attractive year book for 1930-31 has been recently issued by the Olds School of Agriculture. As in former years the book is in magazine form with many fine illustrations. The foreword is written by Hon. George Headley, provincial minister of agriculture and the book is dedicated to F. S. Grisdale, retiring principal and his successor, James Marry.

Cabinet ministers at Ottawa will have to do without government cars in future, but they will each have \$2,000 more salary to enable them to purchase their own. The allowance for motor cars brings the total remuneration of cabinet ministers up to \$16,000 a year. At present they receive \$10,000 salary and \$4,000 as cost-of-living subsidy. This means many chauffeur positions will be abolished, but it is expected they will receive other civil service appointments.

At the annual meeting of the Provincial Chapter of the Imperial Order of the Daughters of Empire held at the Macdonald Hotel in Edmonton last week, Mrs. J. Hugst was elected councillor and re-elected secretary for the year. She was also chosen along with other ladies as nominee for the national council, one of whom will be elected at the national annual meeting. Mrs. Hugst, Mrs. J. H. Loxie and Miss Perry represented the local chapter at the meeting.

A. P. Stetson, of Calgary is the winner of the \$500 slogan contest of the World's Grain Exhibition and conference. This announcement was made by officials of the world-wide grain exhibition and conference to be held at Regina in 1932. The slogan that won Mr. Stetson the prize has been officially adopted and reads: "Show what you grow and share what you know." Mr. Stetson is employed by the Alberta Pacific Grain Co. Ltd. at Calgary and last year won the prize for the best estimate of the 1930 wheat crop, being only 4,000 bushels under the final figure.

**An itching rash A blemished skin Eczema?**

Will DDD heal overnight? Sometimes. More often it takes longer to wash out the poison completely and restore a smooth, clear skin. But the burning, itching, the irritation, are soothed, cooled, instantly.

H. W. Chambers

If your Radio needs repairing or modernizing, call at the Pioneer Office. E. A. Ahlin is an expert on battery sets.

Especially when the May weather is unfavorable the potato crop will often make greater progress sprouting in trays in a light warm place than it will if planted early in cold, windswept ground.

**HAMBLEY ELECTRIC HATCHERIES LTD.**

Winnipeg, Regina, Saskatoon, Calgary, Edmonton.  
"Canada's Largest Hatcheries."

Two big bull moose—one of them one of the finest this year to come out of New Brunswick forests—and six black deer were the trophies of the hunting party headed by Bob Shawley, late manager of New York Yankees. Harry Rice, Yankee outfielder; Henry Bengough, former Yankee catcher, now with Milwaukee, and John Kracke, New York sportsman, were the other members of the party and all were successful in getting moose.

The Southern Alberta honey crop this year will reach at least 700,000 lbs., according to latest estimates. The quality this year is said to be very high.

## Canada Must Win World Championships

World Championships in 1932 will be won by farmers who recognize that the cleanest and best quality seed with the most careful cultivation are essential to the production of exhibition grain. While it is recognized that these things should apply to all crops, the best plan for securing an award is to exhibit a crop which more care probably than it is possible to devote to the whole crop area—and seed to the crop which seed it will not only provide good quality foundation stock for next spring's seeding, but a winning chance for exhibition at

## The World's Grain Exhibition and Conference

REGINA, JULY 25 to AUG. 6, 1932

This great World Exhibition and Conference is expected to be the largest of Canadian farmers, for the advancement of Canadian agriculture, to demonstrate the superiority of Canadian grain, to promote a world-wide demand for Canadian crop products—Canada's greatest asset.

## Local News

A Communion will be observed  
on Sunday at Westerdale, West  
and Knox Church, Didsbury at the  
usual hour.

A meeting to organize a softball  
club will be held in C. E. Reiber's  
office on Tuesday evening at 8 p.m.  
All interested are invited to attend.

Misses E. K. Pratt, J. D. Thom-  
son, H. D. Booker and W. Pitt  
attended an important meeting of  
the Anglican vestries held in Olds  
last Wednesday. It is expected  
the name of Rev. W. J. Archer's  
successor will be announced shortly.

J. V. Berscht's show-window of  
April 9th to 14th of Royal York  
Clothes, which was trimmed by Mr.  
Russell Berscht was entered in com-  
petition put on by W. R. Johnston  
& Co. Ltd. and were successful in  
obtaining third prize. This com-  
petition was held throughout Canada  
the winning of this prize is  
quite a credit to our local firm.

The Ontario Conference of the  
Evangelical Church has just con-  
cluded its 67th annual session, Elma  
being the seat of conference. Bishop  
Dunlop, D.D., of Reading, Pa. was  
presiding officer. Officials from  
U.S. headquarters were also in  
attendance. From many of the  
daily proceedings received here by  
the local pastor, H. E. Roppel, he  
will give a summarized report in  
church on Sunday morning.

Mr. E. V. Woodlock, who has  
taken charge of the Alberta Pacific  
Elevator in succession to Mr. W.  
Leadbetter moved here with his  
family last Wednesday and took  
up residence in the house formerly  
occupied by Mr. Leadbetter. Mr.  
Woodlock has been with the Alberta  
Pacific Elevator Co. for a number  
of years and comes here from Dela-  
con, Alberta where he was stationed  
for the last five years.

## Alberta's New Lieut.-Governor

The appointment of Mr. Justice  
Walsh as Lieutenant-Governor of  
Alberta will bring to a close in the  
near future a judicial career of much  
distinction. During his fifteen  
years as member of the Supreme  
Court of this province, His Lordship  
has observed the highest traditions  
of British justice. His judicial  
attitude has been inspired by a  
desire to do justice to all. He has  
well earned the title of "A Just  
Judge." Practitioners who have  
appeared before him agree that his  
courtesy was unflinching. They al-  
ways received his full consideration.  
His decisions have rarely been up-  
set, an evidence of a remarkable  
ability to assess facts and arrive at  
correct decisions. Lawyers are  
first to declare that several of his  
analyses of evidence and summing  
up of salient facts have been master-  
pieces.

Appointment to the high honor  
of Lieutenant-Governor of the province  
is a fitting tribute to a distin-  
guished judge and fine citizen. His  
devotion to his province in tendering  
him their whole-hearted  
congratulations on his appointment  
to a position which assuredly he will  
fill to the satisfaction of all the  
people of Alberta.

## Here and There

Over 1,600,000 lbs. of salmon were  
caught in the coastal waters and  
rivers of Quebec last year, or 815-  
000 lbs. more than in 1929.

Potato shipments from Halifax  
are now over for the season and  
have been declared to be the big-  
gest in the history of the port.

Illustrating the growth of tour-  
ist travel into Canada, 55,599 for-  
eign cars entered Canada in 1929,  
while in 1930 the total was 54,003-  
468.

At the end of February of this  
year, official registration of radio  
sets in Canada totalled 565,758,  
an increase of \$1,812 over the similar  
period of last year.

Canada, a by-product obtained  
in the production of zinc, was pro-  
duced for the first time in Canada  
early in 1928 at Trail, B.C. Used  
for plating purposes demand for it  
has increased very rapidly.

The Province of New Brunswick's  
largest bond issue was sold at the  
most favorable price in 25 years  
when a bid of 99.438 was accepted  
for \$25,000,000 4 1/2 per cent. 30-year  
bond issue, making the interest cost  
to the province 4.52 per cent.

New bridges to span the St. Law-  
rence and other rivers are to be  
built by the Quebec Government  
this year at a cost of \$8,000,000.  
They will be built at points that  
will link up the highways in the  
province into a whole.

First large cattle consignment to  
move east since November, 15 cars  
or 122 head of cattle for export to  
Great Britain, left Winnipeg by spe-  
cial Canadian Pacific train which  
totalled 37 cars of stock, including  
22 cars for eastern Canada points.

A single British Columbia Sitka  
spruce may contain 8,000 to 10,000  
feet board measure of lumber. Lum-  
ber used in building an ordinary  
freight-car loaded frame house is  
estimated at 15,000 feet, hence two  
good sized Sitka spruce trees would  
suffice for the house.

Crowds estimated at 500,000 peo-  
ple watched the Empress of Britain  
sail down the Clyde from her birth-  
place at Clydebank to undergo  
trials. The ship was escorted by  
six tugs, a police launch and six  
airships. This \$15,000,000 ship  
was built for a speed of 24 knots  
and has already done 26 knots in  
preliminary trials.

Ten minutes terminal stop at St.  
Lenore, Ont., and a chance meeting  
between O. C. Hay and William  
Ardell, Canadian Pacific mechanic,  
spanned 45 years of separation and  
silence between Ardell and his fam-  
ily. It appeared in conversation  
that Hay was Ardell's nephew and  
the latter will now visit his family  
in Vancouver whom he has not  
seen for nearly half-a-century.

### March Forward With Canada

Prizes Offered For Best Designs Conveying Message That Dominion Is Forging Ahead

To the Canadian artist whose completed design best conveys the message that Canada is forging ahead, that economic handicaps resulting from world conditions are being overcome, and that Canadian prosperity can well be fostered by the purchase of Canadian-made products, a group of the Dominion's leading industries is offering an award of \$1,000 in cash.

To seven other artists selected by the judges, additional awards of \$100 each will be made.

Details were announced by W. F. Prendergast, chairman of the committee representing the sponsors, "March forward with Canada" is the basic theme, and the competition is one held in a "prosperity drive" which Canadian manufacturers plan to inaugurate. The awards are offered for competition to all Canadian artists, and each entrant may submit as many designs as he desires. The designs should be miniature color sketches suitable for general reproduction.

From the miniatures entered eight artists will be asked by the judges to submit full color drawings. The designs are to include no advertising for individual firms or industries but to be applicable to Canadian business and industry in general.

### Not Interested in Lesson

Little Kindergarten Pupil Was Just Plain Lonesome

A patient kindergarten teacher was trying to explain the difference between what is round and what is square to her impatient pupils one day, using a ball and a playing block. She would pick up the ball and say, "This is round, and distinctly: 'This is round.'" Then she would put it down, pick up the block, and say: "This is square." Hierarchically she repeated this exercise seven or eight times. "This is round, this is square. Now are there any questions?" One little boy who had just finished the class raised his hand, and she nodded to him. "Can I sit in your lap?" he asked.

### Fourth Best Customer

Canada was Great Britain's fourth best customer in 1929, having advanced one place from the previous year, it was announced by the Department of Trade and Commerce after a report had been received from the British Board of Trade.

There is nothing repulsive in Miller's Worm Powder, and they are as pleasant to take as sugar, so that few children will refuse them. In some cases they cause vomiting, through their action on an unclean stomach, but this is only a manifestation of their cleansing power, no indication that they are harmful. They can be thoroughly depended upon to clear worms from the system.

### Canadian Geographical Society

Dr. Charles Cannell, deputy minister of mines, was re-elected president of the Canadian Geographical Society at the recent annual meeting, the first and second vice-presidents being, respectively, C. G. Gosson and Dr. J. Macintosh Bell.

Quick action saves trouble, worry. Keep Douglas' Egyptian Liniment always handy. Stops bleeding instantly. Catarrhes wounds. Hair comes back. No scar remains.

### Altitude and Power

As an aeroplane increases its altitude, its motor loses much of its power, experiments conducted by the United States Bureau of Standards show. Tests conducted revealed that at an altitude of 25,000 feet a motor which developed 410 horsepower on the ground only developed 160 horsepower at that height.

### New Baggage Device

A device by which baggage may be unloaded and taken on a plane in flight, has been developed. Dropping a load into a chute, the plane's trail line is hooked onto the baggage which is automatically shot forward at the speed the plane is travelling.

A fountain pen for writing in dark places is equipped with a small flashlight.

### New Giant Cunard Liner

Interior Decorations To Be Most Elaborate Of Any Vessel Afloat

Continued rapid progress is being made on the new giant Cunard liner of 73,000 tons which is at present under construction in the yards of John Brown & Company, at Clydebank, Scotland.

Details have reached the local offices of the Cunard Line with reference to a number of the features of the interior decoration of the liner which up to the present is without a name.

Mr. Eric Reford, vice-president of the Robert Reford Company, and general manager of the Cunard Line in Canada, in discussing some of the features which will be part of the new Cunard, mentioned the fact that she will have an exceedingly beautiful church and that it will be decorated in accordance with the best traditions of English ecclesiastical art.

"The liner itself will have eight decks above the water line," he said, "and between the aft and the centre funnels will be built the largest dining room ever to be placed in an ocean liner."

"The boat deck itself will be 70 feet above the water line, and the tops of the funnels, which are forty feet across, about one hundred and thirty feet above. The boat deck is to be about 550 feet long and the promenade deck 720 feet long."

"I understand that the interior decoration of the Cunard has not been settled, but I am sure that it will be the most elaborate that has ever been known on an ocean liner."

"It is fully expected that the construction of the hull will be well advanced by the spring," said Mr. Reford in closing.

"So you decided to quit being an atheist?"

"Yeah, there's no future to it."

The Chinese train comorants, a species of bird, to catch fish for them.

## La Grippe and "Flu" are Spreading

"Flu" First Appears as a Sore Throat, but Gains Tremendous Headway in Six Hours

### AN EFFECTIVE TREATMENT DESCRIBED

Nearly every case of "Flu" starts with a simple cold. At first the throat is sore—often just a little hoarse—soon the infection goes lower—then the chest is affected. A safe plan is to gargle the throat three times daily with "Nerviline"—this will keep the throat free from germs. If there is any sign of tightness in the chest, rub on Nerviline—every drop penetrates deeply—congestion will be relieved—the cold will break up quickly. Many a dangerous case of "Flu" can be avoided by this simple home treatment.

Experienced mothers know how valuable Nerviline is for Coughs, Colds, Sore Throat, and the little ailments that arise in every family. Nerviline in most homes is called "Mother's Best Friend." 35c at all dealers.

### Saskatchewan Poultry Pool

Increase Shown in Volume Of Business Over Previous Year

An increase of nine per cent. in the volume of product handled by the Saskatchewan Poultry Pool, Limited, for the year ended January 31, 1931, as compared with the previous year, was noted in the report of the president, Mrs. Bertha Holmes, submitted at the recent annual meeting of the Pool. A considerable increase in membership was evident, a total of 2,418 new contracts having been received during the twelve months.

### British Machines For U.S.

A British firm, the Wellman Smith Owen Engineering Corporation, Ltd., of Victoria Station House, S.W., has obtained a contract for the delivery of 1,000 tons of machinery to Pittsburgh, Pennsylvania, the heart of the American steel-producing country. It will mean the employment in England of 600 men for six months. The contract is for machinery for the production of weldless steel tube.

### USES PINKHAM MEDICINES

Praises Vegetable Compound, Blood Medicine and Liver Pills

Worms in children, if they be not attended to, cause convulsions, and often death. Mother Graves' Worm Expeller will protect the children from these distressing afflictions.

Everybody's Queer

Call a woman a chick and she smiles; call her a hen and she howls. Call a young woman a witch and she is pleased; call an old woman a witch and she is indignant. Call a girl a kitten and she likes it; call a woman a cat and she hates you. Women are queer. Call a man a gay dog and you flatter him; call him a pup, a hound, or a cur, and he tries to alter the map of your face. He won't mind being called a bull or a bear, yet he resents being called a calf or cub. Men are queer.

Nitroglycerol may be made to explode by hitting it with a hammer.

Birchtown, Quebec—"I live 13 miles from town on a farm, with all my house duties and churning to attend to. At the Change of Life, I became nervous and run-down. The Vegetable Compound helped my whole system. My nerves are better, my appetite is good and I am able to do my work. I have also taken the Blood Medicine and the Liver Pills and they helped me. I will answer letters from women asking about your medicines."—Mrs. RICHARD CHARLTON, Birchtown, Quebec.

## Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

# WINDOLITE

### THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARNs SLEEPING ROOMS ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

### Mountain View Notes

Several ladies have reported that their early hatches of chicks have not been very successful. One said she got three chicks from two settings.

A dance was held in Community Hall in honor of Mr. and Mrs. J. B. Fulkert, who were recently married. It was very well attended and all enjoyed themselves.

The monthly meeting of the W I was held Thursday last in Community Hall. A very good paper on "Agriculture" was given by Mrs. Garnet Figue. This was followed by a contest staged by Mesdames Atkinson and Haynes. After a social hour over the tea-cups the hostesses being Mesdames Smith and Wm. Cones, the members dispersed to face the stern realities of life once again.

This district was visited by a terrific dust-storm early on Sunday morning. Several bygone residents upon waking found their sleeping apartments covered with a layer of sandy loam. None were anxious to analyse the texture of the soil but got busy and swept up the thick of it. It was reported that in parts of France sand had blown over from the Sahara and possibly we are receiving contributions from as far north as Edmonton.

The farmer has had a large number of disagreeable days on which to work outside and one often wonders what his thoughts dwell on as he drives his horses or engine to and fro across the western prairie and prepares the land for seed. Robert Burns the plowman-poet composed some of his greatest poems when behind his plow.

TO THE FARMER

Behold him single in the field,  
Yon sad-eyed, dusty, fearful Cain.  
Sowing and talking to himself:  
"Stop blowing and gently rain."

Alone he sows and sows the grain  
And sings a melancholy strain.  
On listen, for the wind around  
Is echoing over with the sound.

Can no one tell us what he sings  
As he sows the time away below.  
Not of old, or gay, or far-off things  
Or crops some time ago.

No, no, he sings a humble lay,  
A common matter of today:  
"Oh dust, oh drought go, go away,  
Give us rain for a week, every day."

—Original

### Melvin Notes.

Miss Olive Chamberlain and Mr. Gilbert Wright spent Sunday at the home of Mr. and Mrs. E. Cowitz.

A number from this district attended the wedding dance of Mr. and Mrs. J. B. Fulkert. Everyone reports a good time.

Some of our young people drove to Ennervale on Sunday and spent the day with Misses Dorothy Youngs and Margaret Weart.

Mr. and Mrs. A. F. Cowitz motored to Calgary on Thursday, returning Monday. Mr. Cowitz attended the hail adjusters convention.

We thought during the winter months that Fritz would find his mate but we see him a bachelor again this spring. Perhaps he is waiting till June.

Farmers are trying hard to work on the land but with so much real estate changing hands so rapidly these days it is a hard task.

Mrs. Hesegood and Mrs. White-side visited Cremona W.I. on day last week. The ladies were so interested in the new railroad and watching for the train that we hear they got lost, went fourteen miles out of their way but eventually reached the meeting and found Cremona with a good, lively W.I.

### Cheerful News— Reduced Prices!

There is a demand for the finer grades of worsted suitings and in order to enable our customers to secure the cream of values we are reducing:

#### THE "EMPASSY"

Range from \$45.00 to \$40.00

#### THE "CONSULATE"

Range from \$40.00 to \$35.00

Unquestionably these two ranges at the new prices represent values that have hitherto been unknown and they certainly will not be repeated after they are sold out.

Amongst these numbers are cloths manufactured by the most famous English mills that are known the world over wherever the highest grade of materials are worn.

Amongst the manufacturers are:

Josiah France, Huddersfield, Yorkshire, England.

Martin Sons & Co. Ltd., Huddersfield, Yorkshire, England.

Oliver A. Jowett & Co. Ltd., Pudsey, Yorkshire, England.

Wm. Fison & Co. Ltd., Burley-in-Wharfedale, Yorkshire, England.

We have the utmost confidence in recommending these cloths and whoever purchase them will ever remember the abundant value they received for such a modest price.
